Group Results Commentary

BSP has made a strong start to the 2026 financial year, with continued momentum across our business.

Unaudited net profit after tax of K278 million was up 14.6% on 1Q25, reflecting continued operational discipline and the strength of our diversified earnings base. Our capital position remains strong, with a capital adequacy ratio of 23.9%, well above regulatory requirements.

We continue to make good progress executing our Modernising for Growth program. As anticipated, these investments have contributed to higher operating expenses during the quarter. We are approaching peak expenditure for the program during 2026 and 2027 after which we expect our cost-to-income ratio to normalise within our 42%–45% target range.

Papua New Guinea was placed on the Financial Action Task Force's grey list in February 2026. To date, we have not observed any material impacts on our customers or operations, and do not currently expect significant disruption. BSP maintains robust compliance, KYC and AML frameworks and is committed to supporting national efforts to exit the grey list.

The global environment has become more uncertain, with ongoing conflict in the Middle East contributing to higher oil prices and potential supply chain disruptions. This raises the risk of elevated inflation and softer economic growth globally and across our region.

In this context, we continue to take a prudent and disciplined approach to risk management. Asset quality remains sound, and portfolio performance is in line with expectations. We are actively monitoring emerging risks across our lending book and assessing whether any additional provisioning may be required. As at 31 March, no changes to provisioning assumptions have been applied.

BSP is committed to supporting the communities in which we operate. Through our continued investment in financial inclusion, improved access to banking services, and community programs, we play an important role in driving economic participation and development across the South Pacific.
