

# FY22 Annual General Meeting

2022 General Meeting  
Wednesday 16 November 2022

Saving the planet  
One Landfill,  
One Megawatt,  
One Solar Panel,  
One Battery, at a time.

FOCUS YOUR ENERGY

# Managing Director's Address

**FY22 Annual General Meeting**

*16 November 2022*

# Strong operating performance, setting LGI up for growth

Increased and optimised biogas flows, driving  
record financial performance

---

LOST TIME INJURY

**1** LTI

in 57,600 hours  
worked

REVENUE

**\$25.5**<sub>m</sub>

↑ 70%

EBITDA

**\$11.8**<sub>m</sub>

↑ 81%

NPAT

**\$4.8**<sub>m</sub>

↑ 173%

# Strong operating performance, setting LGI up for growth

Increased and optimised biogas flows, driving  
record financial performance

---

**BIOGAS EXTRACTION**

**100m** M<sup>3</sup>

↑ 15%

**NEW VERTICAL  
WELLS**

**150+**

across our major sites

**RENEWABLE ENERGY  
GENERATION**

**87,516** MWh

↑ 8.2%

**ACCUs ACQUIRED /  
CREATED**

**402,225**

↑ 23%

# Hawkesbury – New 12-year agreement

- Partnership with Hawkesbury City Council since 2015 has reduced CO2e emissions by 94,070 tonnes
- New 12-year agreement to operate and expand biogas collection system
- Project registered with Clean Energy Regulator to produce ACCUs for a further 12 years as an upgrade project

# Bunya – Our first battery storage installation

- Purchased Tesla Megapack for our first battery storage installation, at Bunya
- Deploying hybrid battery systems increases our ability to dispatch power at peak periods to optimise the price we receive
- Adding battery storage and optimising our hybrid peaking power stations achieves a significantly higher average price per unit of gas than continuous 24/7 energy export
- Progressing our proprietary Dynamic Asset Control System which automates the process of generating power at the optimal point in the demand cycle

# Mugga Lane – AEMO registration

- In 2020, LGI completed 4.2MW biogas to energy plant. Gas field works and innovative plant design have doubled biogas recovery and energy production
- >15-year contract with two five-year options, for carbon abatement and renewable power generation
- June 2022 – LGI achieved AEMO registration as a non-scheduled registered generator, allowing LGI to settle weekly with AEMO in the wholesale market
- Registration shows that LGI systems and governance meet AEMO requirements and establishes a working relationship for future generation registrations

# Toowoomba

Our eighth renewable power station

- Commissioning expected by end 2022
- Capturing biogas from Toowoomba Regional Council landfill, as a reliable, renewable fuel source to supply power directly to Council's major wastewater treatment facility
- >20-year contract which gives LGI beneficial use rights over the biogas we recover

FOCUS YOUR ENERGY

# Thank You

**Together we can engineer a, zero carbon future.**

**FY22 Annual General Meeting**

*16 November 2022*
